individual presentations the easy way!

One Product Line - Versatile Applications

videodidact® systems stand out due to a number of didactical performances and multifaceted functions. The systems are made for screen transmissions without any delay, at highest screen resolutions.

The videodidact® system is perfect for instructors, teachers or referees who need the perfect tool for creating ideal viewing conditions, who are lecturing based on PCs, and who want to do presentations while gaining the student's full attention.

videodidact® Interactive Whiteboard Control

The videodidact® Interactive Whiteboard Control enables the central connection of an interactive whiteboard via USB (independent of size and model).

With the touch of button the interactive whiteboard can be connected to the instructor PC, or to any student-PC.

videodidact® AudioLine

With the videodidact® AudioLine the classroom can be upgraded to a multi media language lab. The teacher's voice can be transmitted to each single student, to all students via headphones or (external) via speakers.

videodidact® systems are supporting instructors in their daily teaching and are installed all over the world!
